SUMMER

(May to July)

- Certificates
» **APRIL 1**
- DESS, Master's and doctorates (Ph.D.)
» **FEBRUARY 1**

**Candidates who are registered (or who have been registered) at a university.*

SEVERAL PATHS TO A DEGREE

UNDERGRADUATE LEVEL

4-YEAR UDEM BACHELOR'S DEGREE

4 years • 114+ credits

Includes one year of preparatory courses and three years of courses in the discipline. May lead to graduate studies.

UNDERGRADUATE DOCTORATE

4 or 5 years • 164+ credits

Most of the credits are for courses specified by a single discipline or field of study. These programs are called "doctorates" because they lead to the title "doctor": medicine, dentistry, veterinary medicine, optometry and pharmacy. Major** 2 years - 60 credits The major may be the main component of a Bachelor's degree by accumulation or a degree in itself.

BACHELOR'S

3 years • 90+ credits

Specialized

The vast majority of credits are earned in the same discipline. May lead to graduate studies.

Bi-disciplinary

Covers two related fields of study in equal parts. May lead to graduate studies.

COMBINED BACHELOR'S DEGREE

Minor or certificate

1 year • 30 credits

May be combined to create a combined Bachelor's degree.

Minor or certificate

1 year • 30 credits

May be combined to create a combined Bachelor's degree.

Minor or certificate

1 year • 30 credits

May be combined to create a combined Bachelor's degree.

Minor or certificate

1 year • 30 credits

May be combined to create a combined Bachelor's degree.

Major**

2 years • 60 credits

The major may be the main component of a Bachelor's degree by accumulation or a degree in itself.

Minor: Corresponds to one year of a Bachelor's.

Major: Corresponds to two years of a Bachelor's

** Two majors can also be combined to obtain a Bachelor's degree by accumulation.

GRADUATE LEVEL

MICROPROGRAM

1 to 4 sessions • 8 to 18 credits

Introduction to a specialization.

DESS (SPECIALIZED GRADUATE DIPLOMA)

1 year • 30 credits

Focused on the foundations of a specialization and the specific application of that knowledge.

MASTER'S

2 years • 45 credits

In research (with thesis): further specialization with initiation into research.

Professional or specialized (with an internship or supervised project): further specialization and development of the skills for professional practice.

DOCTORATE (PH.D.)

4 to 5 years • 90 credits

Training researchers and professor researchers. Original scientific research applied to a proven methodological approach. Courses and qualifying exams. Writing a thesis and defending it before a jury.

POSTDOCTORAL INTERNSHIP

6 months to 3 years

Acquiring expertise in a field of specialized research.

<https://esp.umontreal.ca/english/postdoctoral-fellow/>

The study paths of future students may vary according to eligibility requirements. For more information, please consult the program description pages on this site: admission.umontreal.ca

MAKE YOUR BUDGET

To get your university studies off to a smooth start, you need to make a realistic budget. Tuition fees, the costs of moving and living are all things to think about when working on your budget.

umtl.ca/planifier-son-budget (in French)

CALCULATE YOUR STUDY COSTS

Use the Bureau du registraire's (Office of the Registrar) cost calculator to see which fees apply specifically to you. You'll be able to find everything you need to know about tuition, other fees and more.

umtl.ca/frais-de-scolarite (in French)

INTERNATIONAL APPLICANTS

To understand how tuition fees are calculated, you need to understand some basics about the Quebec university system to help you on your educational path.

umtl.ca/scolarite (in French)

FINANCING YOUR STUDIES

There are many scholarships to help students with excellent academic records or special profiles to pursue their studies or research projects.

Consult the scholarship directory to learn more about How to finance your studies.

bourses.umontreal.ca (in French)

TUITION EXEMPTION SCHOLARSHIPS

UdeM offers tuition exemption scholarships for international students*.

The best part? Many of you are eligible! All you have to do is apply for admission and your scholarship application will be automatically submitted. Even better, all programs and sessions are covered!

* With the exception of French and French-speaking Belgian candidates.

admission.umontreal.ca/en/scholarship-for-international-students

COORDINATING YOUR ENTRY INTO CANADA

If you are an international student and your immigration papers are not in order before you arrive in Canada, you could experience difficulties getting in.

Upon receipt of your official or conditional admission letter, we highly recommend that you start your immigration process quickly. As a general rule, you should have the following documents before you leave: a Certificate of Acceptance from Quebec (CAQ), a study permit,

and a visitor visa or Electronic Travel Authorization (eTA) (depending on your country of origin). Remember, these procedures should not be taken lightly, so make sure your passport is valid when you start.

For more advice, the Bureau des étudiants internationaux (BEI) is available to answer all your questions.

IMPROVE YOUR FRENCH

Don't let your lack of French proficiency stop you from studying at the Université de Montréal. To improve your language skills at a reputable school, enrol in one of our courses or workshops. Whatever your level, resources are available on campus when you arrive.

ecoledelanguages.umontreal.ca/en

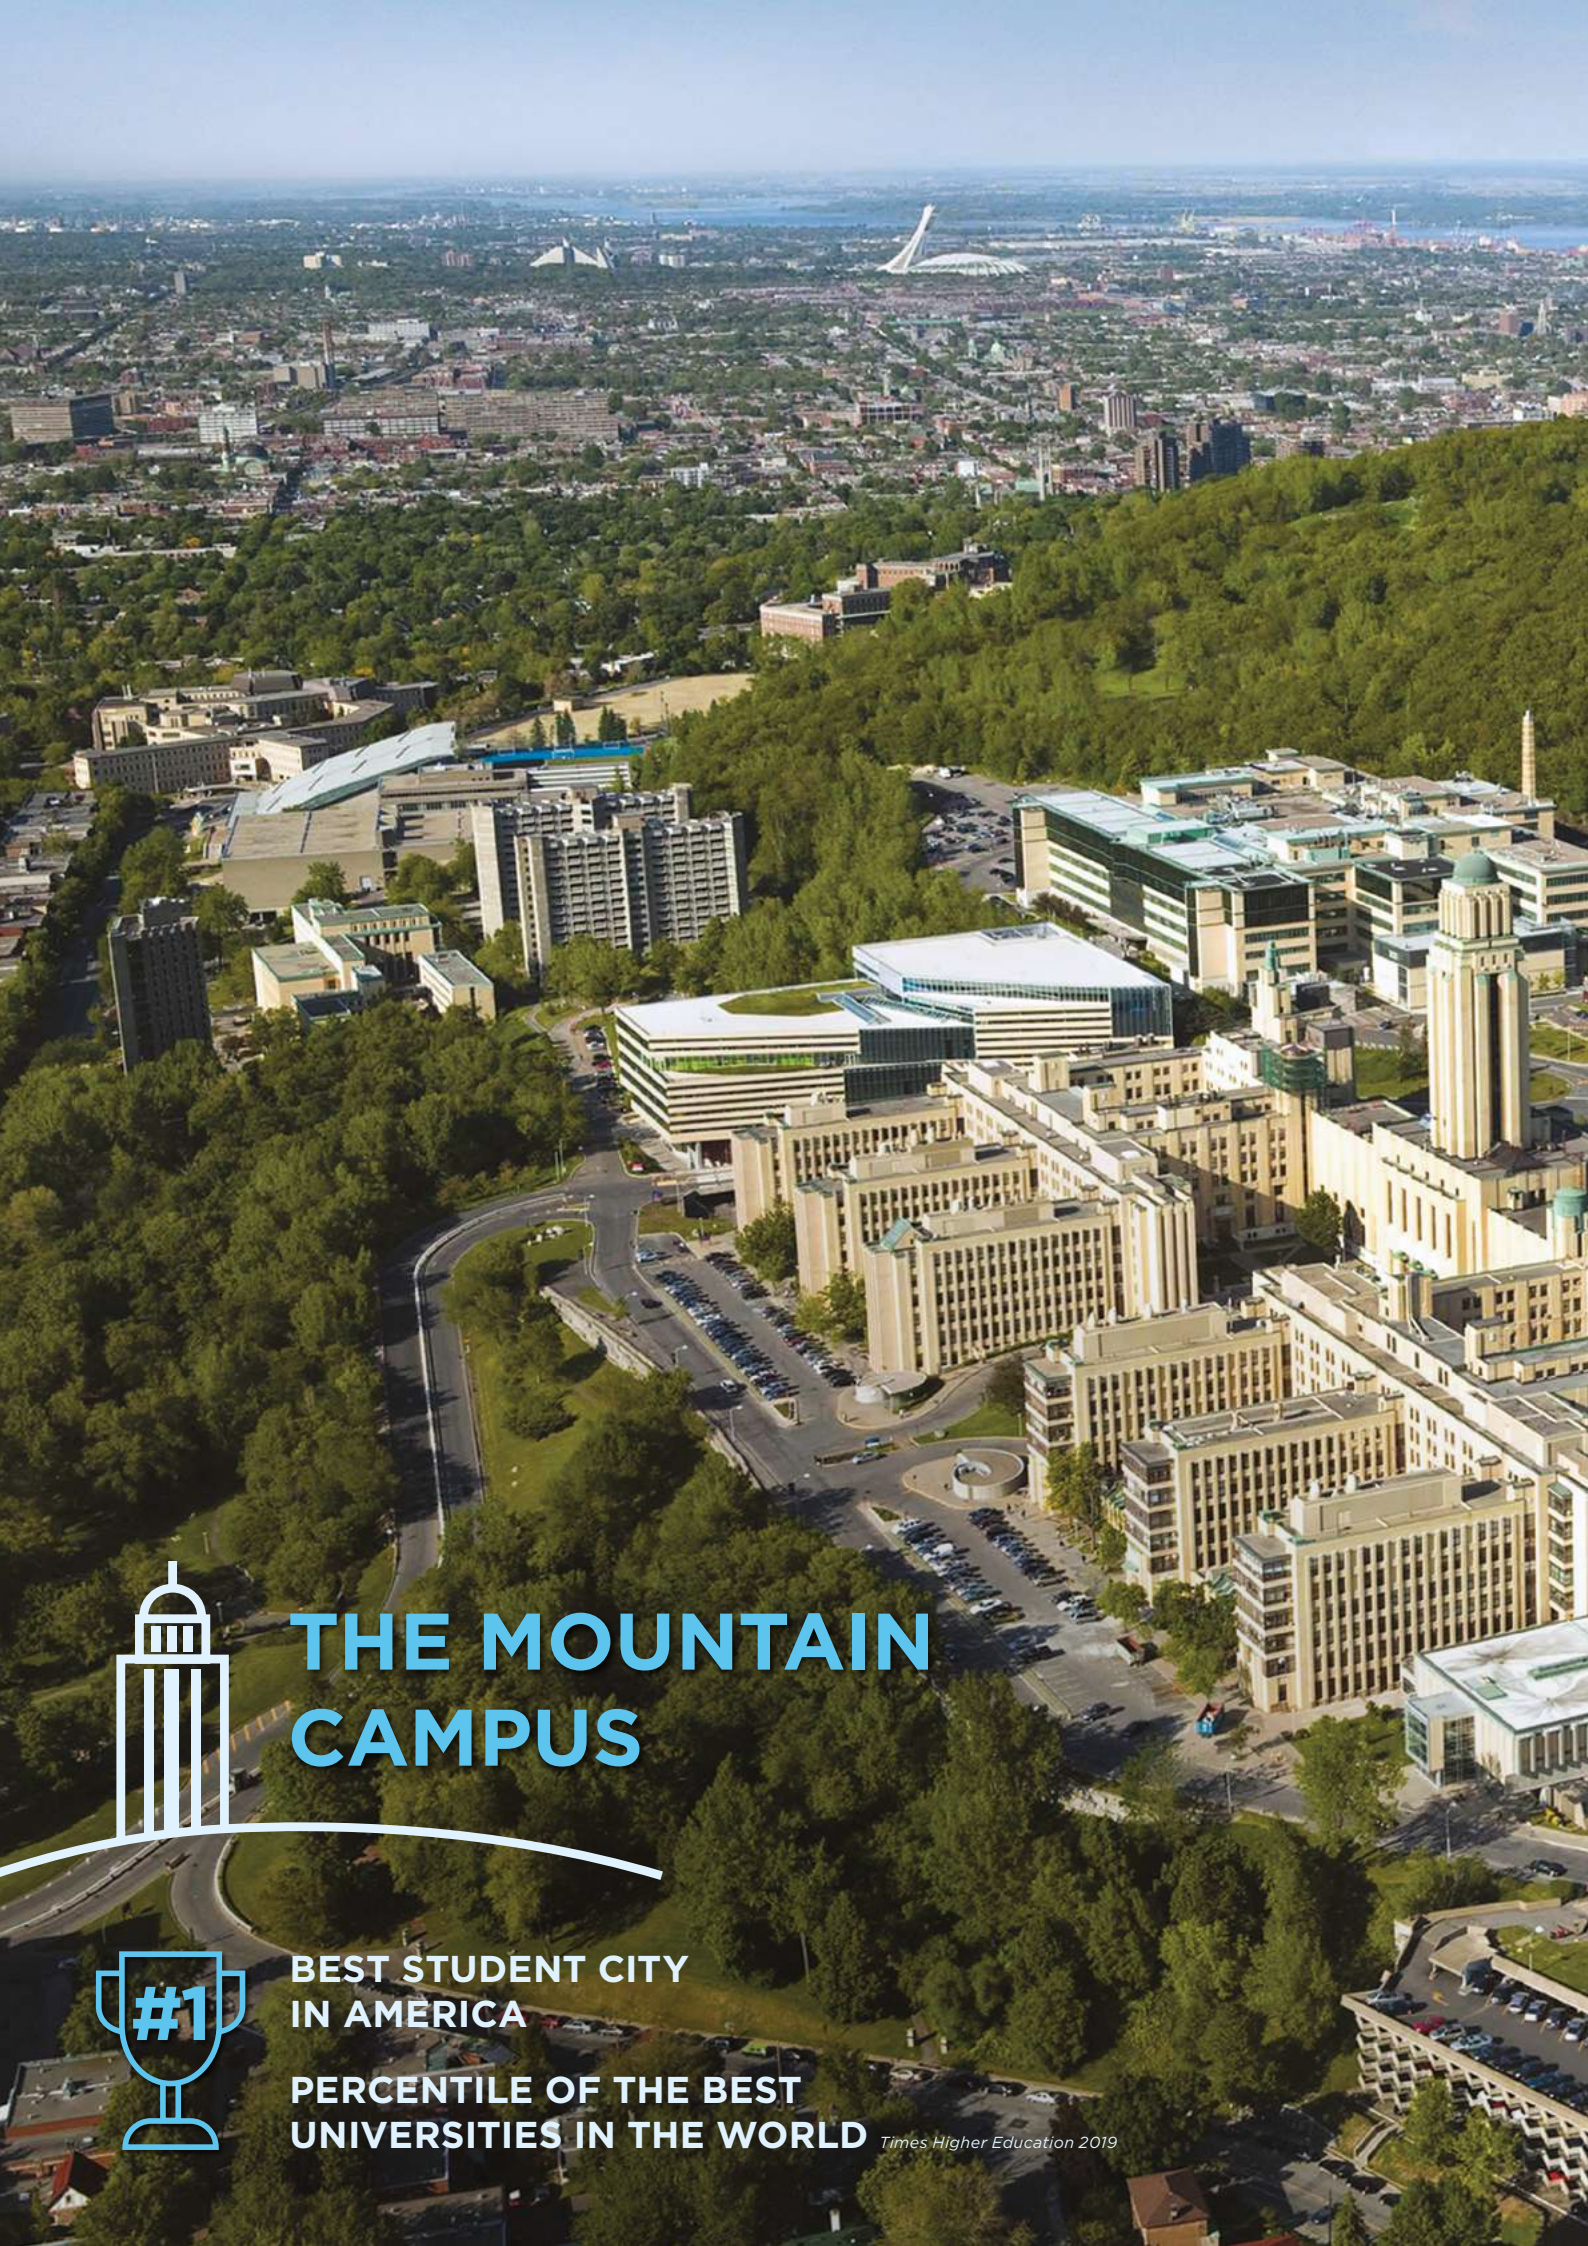

FRENCH INTENSIVE PROGRAM

Do you dream of studying French at a university abroad?
Do you want to improve your language skills quickly and effectively so you can pursue your dream?

Our four-month online Intensive University French Program will help you acquire the oral and written skills you need to advance to level B2 French. That's the level you need to be eligible for most of our study programs!

What's more, you'll get to know how the University works. It's a win-win start to your undergraduate or graduate studies at UdeM!

THE MOUNTAIN CAMPUS

**BEST STUDENT CITY
IN AMERICA**

**PERCENTILE OF THE BEST
UNIVERSITIES IN THE WORLD**

Times Higher Education 2019

MILcampus

A NEW CAMPUS DEVOTED TO THE SCIENCES!

In the heart of the all-new MIL campus sits the Science Complex, featuring research and teaching laboratories for chemistry, geography, physics and biology in the Faculty of Arts and Science.

Students can enjoy a redesigned physical environment and an intellectually stimulating place that encourages exchange and collaboration between disciplines and supports teaching and research. They also benefit from a high-tech infrastructure that mirrors the most efficient industries in the world.

Best of all, the MIL campus is a dynamic environment that fosters partnerships and innovation in leading-edge sectors. In short, a unique academic experience for one and all.
